Notice Board

A screenshot of the 'Notice Board' section, which has a dark green background. It contains several bullet points under different categories: 'ODD semester 2023-24 session.', 'Details regarding QIP Admission 2023-24.', 'Notice regarding contractual engagement of Faculty & Non-Faculty Staff.', 'Notification for admission in M.Tech programme of NIT Agartala under sponsored category for 2023-24 academic session.', and 'Invitation of application of National Overseas Scholarship Scheme (NOSC) for CT candidates for'. A 'View All >' button is at the bottom right.

- 1) The “Notice Board” section has a smaller width and greater length as compared to the “Latest News” section, resulting in a lack of symmetry. There is a lot of unnecessary white space in the frame. This may have been avoided had there been 4 latest news in that section. Furthermore, the colour choice for the notice board is not appropriate as it fails to visually highlight the “New” bullet points in it.

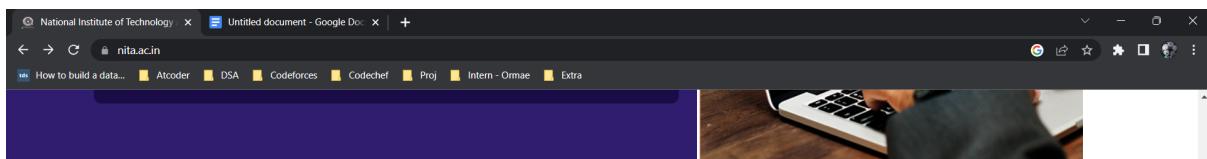

Life on Campus

Our Students

The Institute is located in the midst of serene greenery having a picturesque natural beauty. It is about 4 km away from the National Highway and about 20 km from Agartala, the capital city of Tripura. Agartala is linked with the rest of the country by air, train and road. It has got direct Air Link with Kolkata, Delhi, Chennai, Bangalore, Hyderabad, Guwahati and Imphal. The nearest railway station from the Institute

- 2) The “Upcoming Events” section does not have the left margin which has been followed throughout the website, resulting in lack of consistency. Furthermore, the box where the events are to be displayed seems a bit small and its alignment is off as well.

- 3) The Beige coloured box is unnecessary. It overlaps the photograph which makes it look visually displeasing. Even if it was made to highlight the departments, facilities etc. the colour does not go with the other colours in the frame and the bold font already does enough for the contrast. Furthermore, “Life on Campus” and “Our Students” do not seem to be appropriate headings for the section on where the institute is located.

- 4) The photos in the “Photo Gallery” section seem scattered and follow no specific alignment. They could have made it similar to the Alignment of photos in “Our Departments” section.
- 5) The website lacks a search bar which is necessary to quickly find relevant information in a college website which has so much information.

Website 2 : IIT (ISM) Dhanbad (iitism.ac.in)

The screenshot shows the homepage of the IIT(ISM) Dhanbad website. At the top, there is a red header bar with the institute's name and logo. Below it is a navigation bar with various links like About, Admissions, Academics, Faculty, Research, Innovation, Placement, Webinar Links, In Media, Students, IR, and Alumni. The main content area features several sections: 'ATTEND IIT(ISM) - make a beginning with us' with arrows pointing right; 'WELCOME TO IIT(ISM) UG ADMISSIONS 2023-2024' with a large 'OPEN HOUSE' button; and a section about free admission with a list of benefits and icons. There are also images of students and campus life.

- 1) The IIT name and logo is very small in the top left corner as a result of which it is not getting any visual priority. Furthermore, the red background does not suit the space above the navbar as red is a colour that we associate with urgency/danger and the information (the institute name and logo) is not meant to trigger any of them.
- 2) The contents of the navbar have spilled out from the screen which is a bad design.

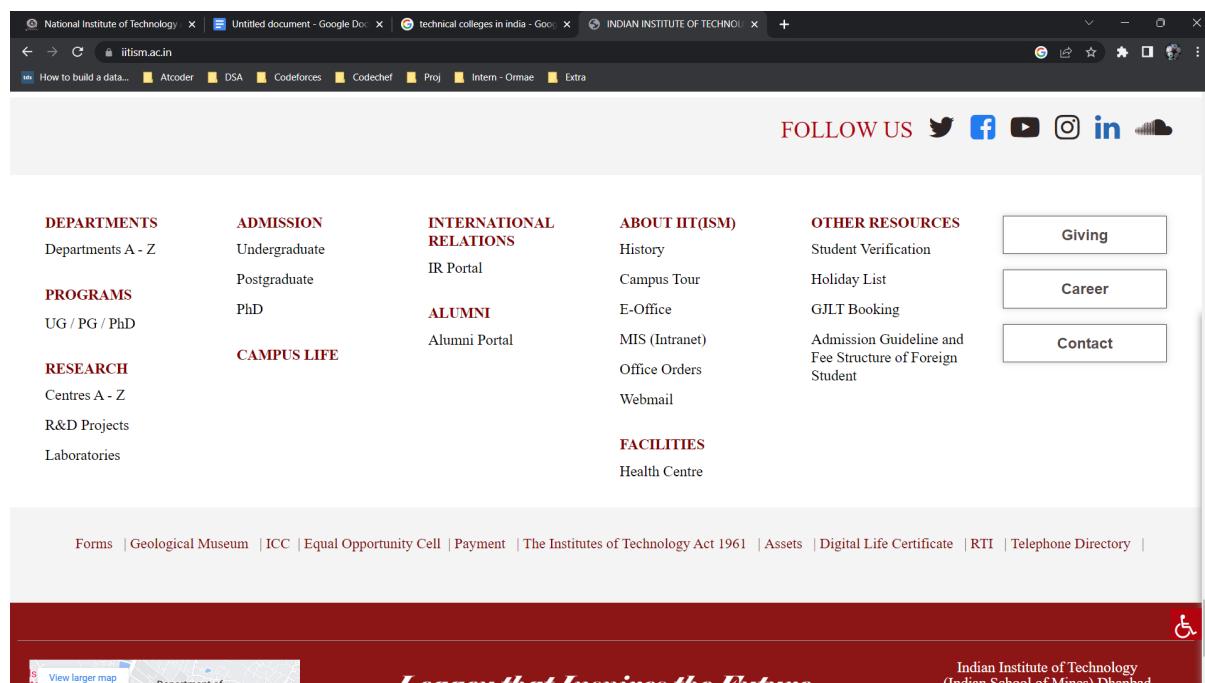

- 3) There is too much text and information that has been crammed in the view. As a result it gets difficult to look at and process such a large volume of information. This much information could be distributed throughout the website.

The screenshot shows the homepage of the IIT(ISM) website. At the top, there is a navigation bar with various links and a search bar. Below the navigation bar, there is a banner titled "Birds on campus" featuring five bird species: Brahminy Myna, Brown Headed Barbet, Crow, Myna, Crow Pheasant, and Jungle Babbler. Below this banner, the main title "IIT(ISM) NOTICES" is displayed. Underneath the title, there are two main sections: "NOTICES" and "IMPORTANT". The "NOTICES" section contains two items: "12 . Syntheses of some rare sugars and some of their oligosaccharides of biological relevance" and "13 . Visible light mediated transformation of organic compounds". A "View All" button is located at the bottom of this section. The "IMPORTANT" section contains links to "IIT(ISM)@ 2026: Dream Together! Build Together!", "Recruitment@ IIT(ISM)", "Institute Newsletter", "RTI", and "Tender". A red accessibility icon is visible on the right side of the page.

- 4) There is a “Birds on Campus” section right after the top section, which does not merit such a high position in the college website.

The screenshot shows the "MEDIA & BRANDING" section of the IIT(ISM) website. The main title is "MEDIA & BRANDING" with the subtitle "Keeping abreast of the latest". Below the title, there are four social media links: TWITTER, LINKEDIN, FACEBOOK, and YOUTUBE. A red box highlights a "Tweets from @IITISM_DHANBAD" section. It includes a "Follow on Twitter" button and a message about schools visiting research labs under K-12 Outreach program. It also mentions that interested schools can register for Research Lab tour via email. Below this message are four small images showing groups of people in a lab or classroom setting. A red accessibility icon is visible on the right side of the page.

- 5) There is a separate section on “Media and Branding” with a lot of whitespace around it making it stand out significantly. This is unnecessary and these things could have been put subtly in the section above the navbar along with the college name and logo.

- 6) In the footer section, the buttons are placed on the side along with other links. As buttons have a higher priority than simple hyperlinks, it would have been better if they were placed horizontally above the hyperlinks. That would have given the footer a better symmetry. Also we see a repetition of the media handles of the college, which is unnecessary.
- 7) Throughout the website, there is a lack of appropriate grouping of information and information seems to be scattered and disorganised. E.g right after the “Media and Branding” section, there is a carousel displaying the alumni of the college without any heading for it.
